

Just Arrived to Eltek: The Best and New High Speed Modular 4 Micro drilling Stations

The MultiStation Drilling Machine Offers:

- Production hall flexibility
- High Accuracy & Repeatability
- Speed & Productivity

The Integrated vision system allows the processing of particular applications such as **Ball Grid Array (BGA)** products and the routing of patterns related to the position of specified references. In addition, all stations are equipped with advanced system for controlled depth drilling.

All machines equipped with a barcode reader for automatic reading (and downloading) of the drilling programs as part of Industry 4.0 and the company's mistake proof operation plan.

These options allow high flexibility of various jobs to be processed with high level of production management.
